## References

### General Formatting

- In the Reference List, references are listed numerically in the order they are cited in the text. Two references should not be combined under a single reference number.
- Use Arabic superscript numerals outside periods and commas, inside colons and semicolons. When more than 2 references are cited at a given place in the manuscript, use hyphens to join the first and last numbers of a closed series; use commas without spaces to separate other parts of a multiple citation.
- Use the author's surname followed by initials without periods or spaces. In listed references, the names of all authors should be given unless there are more than 6, in which case the names of the first 3 authors are used, followed by "et al." Do not use and between names.
- References to material not yet accepted for publication or to personal communications (oral, written, and electronic) are not acceptable as listed references and instead should be included parenthetically in the text.
- Abbreviate and italicize names of journals. Use initial capital letters. Abbreviate according to the listing in the PubMed Journals database. For information on how journal title abbreviations are constructed, see <http://www.nlm.nih.gov/pubs/factsheets/constructitle.html>.
- In article titles, capitalize only the first letter of the first word, proper names, and abbreviations that are ordinarily capitalized.

## Basic Formats and Examples
